Summary

Next.js & React Frontend Developer specializing in high-performance, full-stack web applications. Expert in leveraging modern rendering strategies (SSR/ISR) to optimize SEO and Core Web Vitals. Proven track record of delivering seamless user experiences through optimistic UI updates, robust state management, and resilient error-handling architectures.

Skills

Languages & Core:

TypeScript, JavaScript (ES6+), Python

Backend:

Next.js API Routes, MongoDB with Mongoose, REST APIs, ESLint, Prettier, Zod, Trigger.dev, Prisma, Drizzle ORM, Arcjet and ImageKit, AI/LLM Integration: Gemini API

Frontend:

React 19, Next.js (SSR), Tailwind CSS, Shadcn/UI, Material UI, Redux Toolkit, React Query, Context API

Security & Ops:

Next-Auth (v5), Clerk, Arcjet, Sentry, PostHog, Git/GitHub

Projects

Flow AI

- Developed Flow AI, a real-time collaborative system architecture platform
- **Reduced page load times by 60%** by architecting a client-side caching layer with React Query and implementing code-splitting/lazy-loading for complex visual canvas components.
- Engineered a real-time collaborative canvas using React Flow powered with LiveBlocks backend allowing concurrent users to design software architectures simultaneously.
- Handled long task run via Trigger.dev backend including AI spec-generation and AI design chat with comprehensive request live state feed for user

ECourse Platform

- Built an LMS platform managing courses and products for Admins and users
- **Integrated Clerk** to manage secure, multi-role user authentication and session management for administrators and users.
- Architected a secure LMS database schema utilizing **PostgreSQL** and **Drizzle ORM**, optimizing query performance for course progress tracking.
- Implemented a dynamic, location-aware pricing system using **Arcjet**, automatically applying Purchasing Power Parity (PPP) discounts based on country-level IP data.

Lorial

- **Boosted data load efficiency by 50%** across a developer event platform by implementing an advanced hybrid caching strategy using React Query and Next.js server-side caching.
- Managed cloud image processing via ImageKit and MongoDB Atlas.
- Integrated **PostHog** and **Sentry** to establish real-time observability, reducing error-identification time and capturing user behavior analytics.
- Implemented robust authentication using Next Auth, integrating OAuth and credential providers for secure user access.

Certificates

- **CS50P:**  CS50's Introduction to Programming with Python, Harvard University (via edX). Completed on 2024. Mastered Python programming, algorithms, and data structures through project-based learning.
- **Algorithms and Data Structures:**  Mastering Algorithms and Data Structures in TypeScript with Codesignal web platform with problem-based learning. Completed on 2025
